CLAUDIO'S SOLUTION

- Budget and resource savings on repetitive activities;
- Visualization of every task performed by automation;
- Monitoring of the flow progress with alerting on dashboard and emails;
- Ability to add robot executables on individual PCs for Client-side automation;
- Ability to add easily custom applications and On Premise.

CASE STUDIES

FINANCE AND ACCOUNTING

- Integrated invoicing process
- Automatic data collection using OCR
- Advanced spreadsheet management and data reconciliation

Designed for the accounting and finance of companies that need to optimize management processes and want to improve workflows, Claudio makes it possible to automate and monitor up to 15 times the number of daily processes in one third of the time, while increasing the rate of machining accuracy.

CUSTOMER SERVICE

- Automated request sorting
- Reminders and complaints management
- Customer Satisfaction Monitoring

Mailboxes receive hundreds of emails daily that need to be filtered, forwarded to and processed by the right operator. An efficient customer service is a vital element for companies to stay competitive. Claudio filters addresses, domains, keywords, name of the documents and activates a flow of forwarding and sending notifications, as needed.

HUMAN RESOURCES

- Integrated communication sorting
- Automated on-boarding and e-recruiting
- Management of timesheets and industrial work scheduling

Claudio is able to digitize the human resources department's processes, transforming it into HR 4.0, by making h24 services available in self provisioning based on precise authorization levels, with complete traceability of all processes and with constant monitoring of workloads and time of execution.

IT OPERATION

- Integrated invoicing process
- Automatic data collection using OCR
- Advanced spreadsheet management and data reconciliation

Claudio intervenes efficiently and error-free in all those repetitive and human-error-prone tasks, ensuring that IT staff focus on more strategic activities, reducing errors and meeting business needs more efficiently.

MARKETING AUTOMATION & SALES ENABLEMENT

- Integrated invoicing process
- Automatic data collection using OCR
- Advanced spreadsheet management and data reconciliation

Designed for the accounting and finance of companies that need to optimize management processes and want to improve workflows, Claudio makes it possible to automate and monitor up to 15 times the number of daily processes in one third of the time, while increasing the rate of machining accuracy.

DATA MANAGEMENT

- Automated migration and data entry
- Automated data update and cross-checking
- Data extraction from all formats and report generation

The production of business or management control reporting requires a great deal of organizational effort, which often comes up against certain limitations, often related to tight deadlines or even reliability issues. Claudio can support enterprise data management automating low value-added activities.

PROCESS AUTOMATION

- Integration of external software
- Automatic task sorting
- Administrative process management

Business process automation can increase productivity and profits and meet the business needs. With Claudio, organizations can automate the most repetitive and time-consuming manual processes to maintain a competitive advantage and expand their opportunities in a volatile and ever-changing market.
